

## **EAST PROVIDENCE WATERFRONT DISTRICT COMMISION**

### **MEMO**

Date: Feb. 17, 2020

Topic: Kearsage Solar LLC Planting

---

The following items related to the proposed planting have been addressed in emails with Dan Voss. He has indicated that the landscape architect will make the following revisions to the final plans.

- The composition of each of the planting bed, as one type of plant per bed, will be indicated
- The plant list will be revised with the substitution of *Ilex glabra* for *Cephalanthus*.  
Large shrubs are preferred so no cultivars will be specified for the 2 *Ilex*
- The minor discrepancy in soil depth will be resolved with soil depth as indicated on the detail (not the note)
- A guaranty note will be added
- The landscape architect's stamp and signature will be added

There has been discussion about the location of planting beds inside or outside of the fence. Inside as shown on the plans seems better so the fence offers some protection for the new planting.

Sara Bradford, LA
